## Architecture SDK

Architecture  
DWG files

CORE 

## Map SDK

Autodesk®  
Map 3D

EXTENSION 

## Mechanical SDK

Autodesk®  
Mechanical® files

EXTENSION 

## Civil SDK

Autodesk® Civil 3D® files  
& LandXML

EXTENSION 

# BIM

## IFC SDK

Work with any version of IFC,  
developed in collaboration  
with bSI

CORE 

## BimRv SDK

Work with Revit® data without  
dependencies on the native  
Revit® application

EXTENSION 

## Scan-to-BIM SDK

Convert point cloud data  
to 3D BIM models

EXTENSION 

## BimNv SDK

Work with Autodesk®  
Navisworks® files from  
any application

EXTENSION 

# 3D CAD

## Step SDK

Complete solution  
for professional STEP  
interoperability

CORE 

## MCAD SDK

JT, Solidworks, Inventor  
and more

EXTENSION 

## Mechanical SDK

## ODA Platform inWEB

### **Drawings inWEB™**

DWG editing  
in web

### **CDE SDK**

Create a new common  
data environment  
or enrich existing  
one with formats  
and functionalities  
from ODA

### **All SDKs**

available in web

Under development ✨

# Drawings inWeb™

Edit and view DWG files  
directly in the browser

Full control over  
data and security

Deployable in private or  
public clouds (Azure, AWS)

Supports 2D and 3D: zoom, pan,  
& orbit navigation

Based on a proven C++ engine  
compiled to WebAssembly

# CDE SDK

## Common data environment

[Visit CDE page](#) 

**Visualize & Markup**

**Collaboration & Communication**

**Centralized Data Management**

**Data Integration & Interoperability**

**Version Control & Revision Management**

**Performance & Scalability**

**Secure Access & Permissions**

**Run on**

Azure

## PRIVATE CLOUD

Quick deployment in any environment including an isolated local network without connecting to third-part services.

Source Code access with Founding membership

### CDE SDK includes

- ✦ Web server with REST API
- ✦ JavaScript library for rendering 2D and 3D files in a browser
- ✦ Various auxiliary applications from the WebTools package for running various tasks on the backend

# Visualize

[Visit Visualize page](#) 

**Rich import possibilities with  
access to native properties**

**Rich text rendering  
abilities**

**Optimized performance**

**Multi-threaded support**

**Progressive mesh object  
for LOD support**

**Advanced GPU effects like  
real-time shadows**

# Visualize

[Visit Visualize page](#)

[Open video](#)

# Publish

[Visit Publish page](#) 

**Publishing from  
CDE**

**Complete PRC  
& Publish APIs**

**Complete 2D & 3D  
PDF export**

**Publishing from all  
supported formats**

**Extensive Configuration  
Options**

**100% compatible with ISO  
standards & Adobe® tools**

**Set of predefined controls  
for 3D publications**
